

## Singapore Wild Marine Mammal Survey (SWiMMS)

SWiMMS, funded by the Wildlife Reserves Singapore Conservation Fund, aims to monitor the dolphin, porpoise and dugong populations in Singapore waters by establishing a volunteer network and reporting system. The SWiMMS research team of the Marine Mammal Research Laboratory needs your help.

If you should see a marine mammal in Singapore or regional waters, please let the SWiMMS team know. Email [http://www.nss.org.sg/cpanel/edit\\_news.aspx?id=30&group\\_id=quXItV4R2jc=1](http://www.nss.org.sg/cpanel/edit_news.aspx?id=30&group_id=quXItV4R2jc=1) them at [swimms@nus.edu.sg](mailto:swimms@nus.edu.sg) or fill in their on-line reporting form with as much information as you can. You can find more information on the different types of marine mammal that can be seen in Singapore waters and the work done by the Marine Mammal Research Laboratory (National University of Singapore) at [www.tmsi.nus.edu.sg/mmrl](http://www.tmsi.nus.edu.sg/mmrl)
